功率訊號轉小訊號　BS3

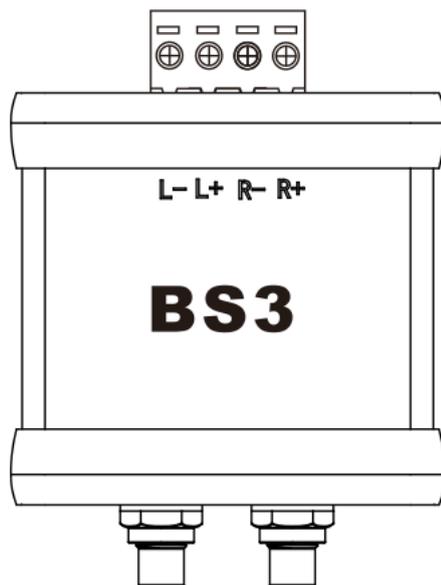

BS3 規格:

★ 輸入頻率 20HZ～100KHZ +-3dB

★ 最大輸入功率:100W（56Vpp）

★ 輸入訊號:輸出訊號約為 4:1

★ 隔離電壓:1000V

BS3 功能:

★ 隔離原廠主機(安卓主機)與外加裝置(M-ap、DSP、AMP)的接地,有助於隔離電源接地的干擾。例如車上發電機的接地干擾。

★ 優化聲音。

★ 使用訂製端子。

Power signals to small signals:BS3

BS3 Standard:

★ Input rate:20HZ～100KHZ +-3dB

★ Maximum input power:100W (56Vpp)

★ Input signal: The output signal is approximately 4:1 specification

★ Isolation voltage: 1000V

BS3 function:

★ Isolate the ground of the original host (Android host) and the external device (M-AP, DSP, AMP) to help isolate the device Interference from the power supply ground. For example, ground interference from the on-board generator。

★ Optimize sound。

★ Use custom terminals。
